

## TaperTwin

Bespoke racing performance: Feather-light at the clew, handleable at the winch, excellent in stoppers

### Breaking Loads and Weights

Ø in mm	kg/100m	Elongation at 10% of break load		0.70 %	
		Bl. real [daN]*	Bl. linear [daN]**		
4	1.1	400	440		
5	1.7	700	770		
6	2.4	1650	1815		
8	3.9	2900	3190		
10	6	3700	4070		
12	9.2	7500	8250		
14	12	9900	10890		
16	19.1	17000	18700		

\* Spliced break load

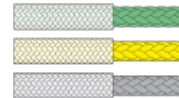

\*\* Break load in accordance with DIN EN ISO 2307

\*\*\* Break length in spliced condition

- Core 12-plait Dyneema® SK75 with coloured Bonthane coating for optimised traction with cover
- Cover 24 or 32-plait from HT Polyester
- Excellent breaking load with smallest elongation
- Abrasion resistant cover, particularly suitable for stoppers
- TaperTwin is the rope for stripping and tapering
- Cover only present in specific sections to ensure highest strength at minimal weight
- For sheets and halyards on dinghy and regatta yachts
